## Bicolor Symbol LED <br> in $2.5 \times 5$ mm Untinted Top-Diffused Package

| Color | Type | Technology | Angle of Half Intensity <br> $\pm \varphi$ |
| :---: | :---: | :---: | :---: |
| High efficiency red | TLSV5100 | GaAsP on GaP | $50^{\circ}$ |
| Green | TLSV5100G | GaP on GaP | $50^{\circ}$ |

## Features

- Even luminance of the emitting surface
- Ideal as flush mounted panel indicators
- For DC and pulse operation
- Color mixing possible due to separate anode terminals
- Luminous intensity selected into groups
- Categorized for green color
- Wide viewing angle
- Common cathode

## Applications

Indicating and illumination purposes

## Absolute Maximum Ratings

$\mathrm{T}_{\mathrm{amb}}=25^{\circ} \mathrm{C}$, unless otherwise specified
TLSV5100,TLSV5100G

| Parameter | Test Conditions | Symbol | Value | Unit |
| :--- | :--- | :---: | :---: | :---: |
| Reverse voltage per diode |  | $\mathrm{V}_{\mathrm{R}}$ | 6 | V |
| DC forward current per diode |  | $\mathrm{I}_{\mathrm{F}}$ | 30 | mA |
| Surge forward current per diode | $\mathrm{t}_{\mathrm{p}} \leq 10 \mu \mathrm{~s}$ | $\mathrm{I}_{\mathrm{FSM}}$ | 1 | A |
| Power dissipation per diode | $\mathrm{T}_{\text {amb }} \leq 55^{\circ} \mathrm{C}$ | $\mathrm{P}_{\mathrm{V}}$ | 100 | mW |
| Total power dissipation | $\mathrm{T}_{\mathrm{amb}} \leq 55^{\circ} \mathrm{C}$ | $\mathrm{P}_{\text {tot }}$ | 150 | mW |
| Junction temperature |  | $\mathrm{T}_{\mathrm{j}}$ | 100 | ${ }^{\circ} \mathrm{C}$ |
| Storage temperature range |  | $\mathrm{T}_{\text {stg }}$ | $-55 \mathrm{to}+100$ | ${ }^{\circ} \mathrm{C}$ |
| Soldering temperature | $\mathrm{t} \leq 5 \mathrm{~s}$, |  |  |  |
| 2 mm from body | $\mathrm{T}_{\text {sd }}$ | 260 | ${ }^{\circ} \mathrm{C}$ |  |
| Thermal resistance junction/ambient per diode |  | $\mathrm{R}_{\text {thJA }}$ | 450 | $\mathrm{~K} / \mathrm{W}$ |
| Thermal resistance junction/ambient total |  | $\mathrm{R}_{\mathrm{thJA}}$ | 300 | $\mathrm{~K} / \mathrm{W}$ |

## Ozone Depleting Substances Policy Statement

It is the policy of Vishay Semiconductor GmbH to

1. Meet all present and future national and international statutory requirements.
2. Regularly and continuously improve the performance of our products, processes, distribution and operating systems with respect to their impact on the health and safety of our employees and the public, as well as their impact on the environment.

It is particular concern to control or eliminate releases of those substances into the atmosphere which are known as ozone depleting substances (ODSs).

The Montreal Protocol (1987) and its London Amendments (1990) intend to severely restrict the use of ODSs and forbid their use within the next ten years. Various national and international initiatives are pressing for an earlier ban on these substances.

Vishay Semiconductor GmbH has been able to use its policy of continuous improvements to eliminate the use of ODSs listed in the following documents.

1. Annex $A, B$ and list of transitional substances of the Montreal Protocol and the London Amendments respectively
2. Class I and II ozone depleting substances in the Clean Air Act Amendments of 1990 by the Environmental Protection Agency (EPA) in the USA
3. Council Decision 88/540/EEC and 91/690/EEC Annex A, B and C (transitional substances) respectively.

Vishay Semiconductor GmbH can certify that our semiconductors are not manufactured with ozone depleting substances and do not contain such substances.

We reserve the right to make changes to improve technical design and may do so without further notice. Parameters can vary in different applications. All operating parameters must be validated for each customer application by the customer. Should the buyer use Vishay-Telefunken products for any unintended or unauthorized application, the buyer shall indemnify Vishay-Telefunken against all claims, costs, damages, and expenses, arising out of, directly or indirectly, any claim of personal damage, injury or death associated with such unintended or unauthorized use.
